

# GALILEO LOUPES

These binocular loupes with Galileo optics are the perfect solution to meet your main magnification needs, combining an optimized visual field with maximized depth of field for a natural and quick adaptation, ideal for continuous use.

CUSTOMIZABLE

WIDE  
VISUAL FIELD

LIGHTWEIGHT

EASY  
ADAPTATION

Binocular with **Galileo** optical design for **high resolution** images

**Extra lightweight** titanium frame

**Polycarbonate** lenses with **anti-reflective** coating for greater **durability** and a **premium image**

Manufactured by Admetec with high-quality components in collaboration with FUJITOK® Corporation, Japan, one of the leading **precision lens** suppliers.\*

All our loupes are designed according to each professional's individual characteristics, based on an ergonomic study and optical measurements carried out by an expert team, following the protocols developed by Vittrea.

Magnification	Working distance (mm)	Visual field (mm)	Depth of field (mm)	Frame included 
2,5x	350 • 400 • 450	105 • 120 • 135	105 • 130 • 160	49 g
2,7x	350 • 400 • 450	90 • 100 • 110	90 • 110 • 135	41,5 g
3,2x	350 • 400 • 450	75 • 85 • 95	60 • 75 • 90	42 g

\*FUJITOK lenses are used in optical instruments, digital cameras, microscopes, astronomical devices, and medical applications for some of the world's largest companies, including Hoya, Canon, Olympus, Nikon, and Sony.
